A
:

1. Aylana.
2. To`rtburchak va ularning turlari.
3. Uchburchak va ularning turlari.

Aylana

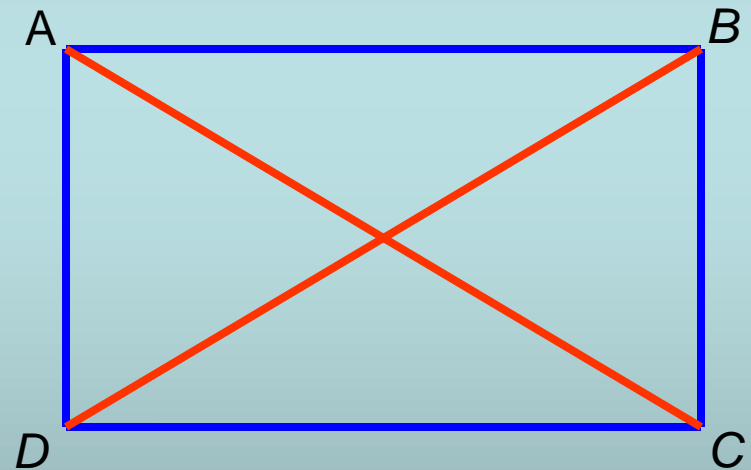

Tekislikning berilgan nuqtadan bir xil uzoqlashgan hamma nuqtalaridan iborat figura **aylana** deyiladi. Berilgan nuqta **aylananing markazi** deyiladi.

To`rtburchak va ularning turlari.

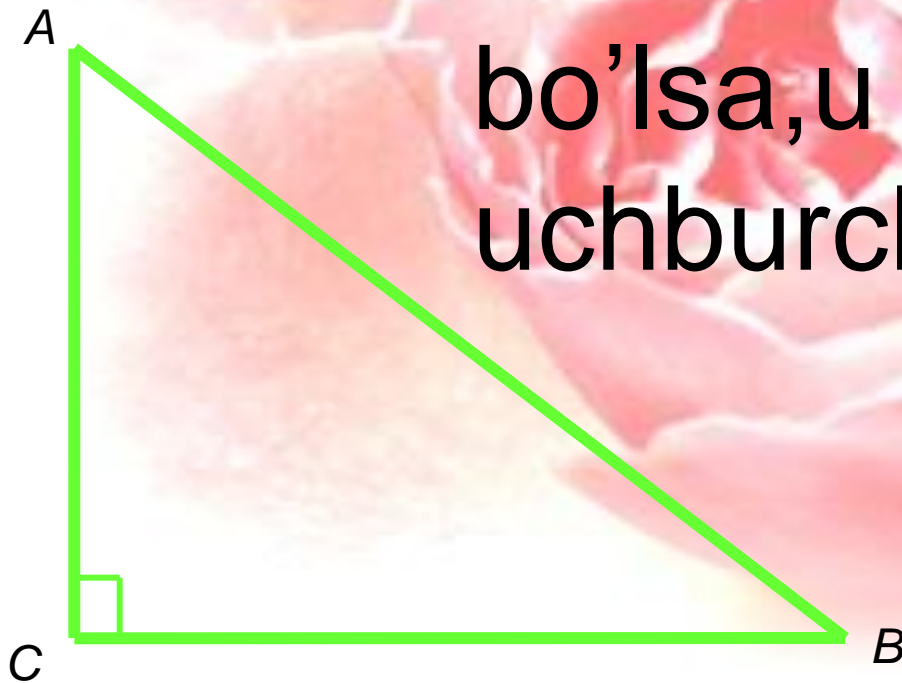

1. To`g`ri to`rtburchak.

To`g`ri to`rtburchak hamma burchaklari to`g`ri bo`lgan parallelogrammdir.

Uchburchak va ularning turlari.

- Agar uchburchakning bir burchagi 90° ga teng bo'lsa, u to'g'ri burchakli uchburchak deyiladi.

Agar uchburchakning ikki yon tomoni teng bo'lsa u teng yonli u uchburchak deyiladi

- Agar uchburchakning bir burchagi 90° ga teng bo'lsa, u to'g'ri burchakli uchburchak deyiladi.
