

Computers in our life

Nowadays computer is a part of our life

A computer is an electronic machine which can be used to store, process and display data

We know many types of computer:

- A personal computer
- A desktop
- A laptop
- A notebook
- A subnotebook
- A palmtop

The potential uses of computers are infinite.
We use computer everyday: in school, in
work, at home

Computer help you to use Internet. Internet is a network of communication and information

All people can use Internet how they want: some people for studies, some for distraction.

Internet can help you quickly search all information what you want. Its very help in studies.

Also you can use Internet in
your wish:

1. Write and publish blogs

2. Download a files

3. Send e-mails

4. Find new friends from another countries

5. Play online games
