

# *Water- saving irrigation technologies.*

By Abdukarimov Abror STST-127

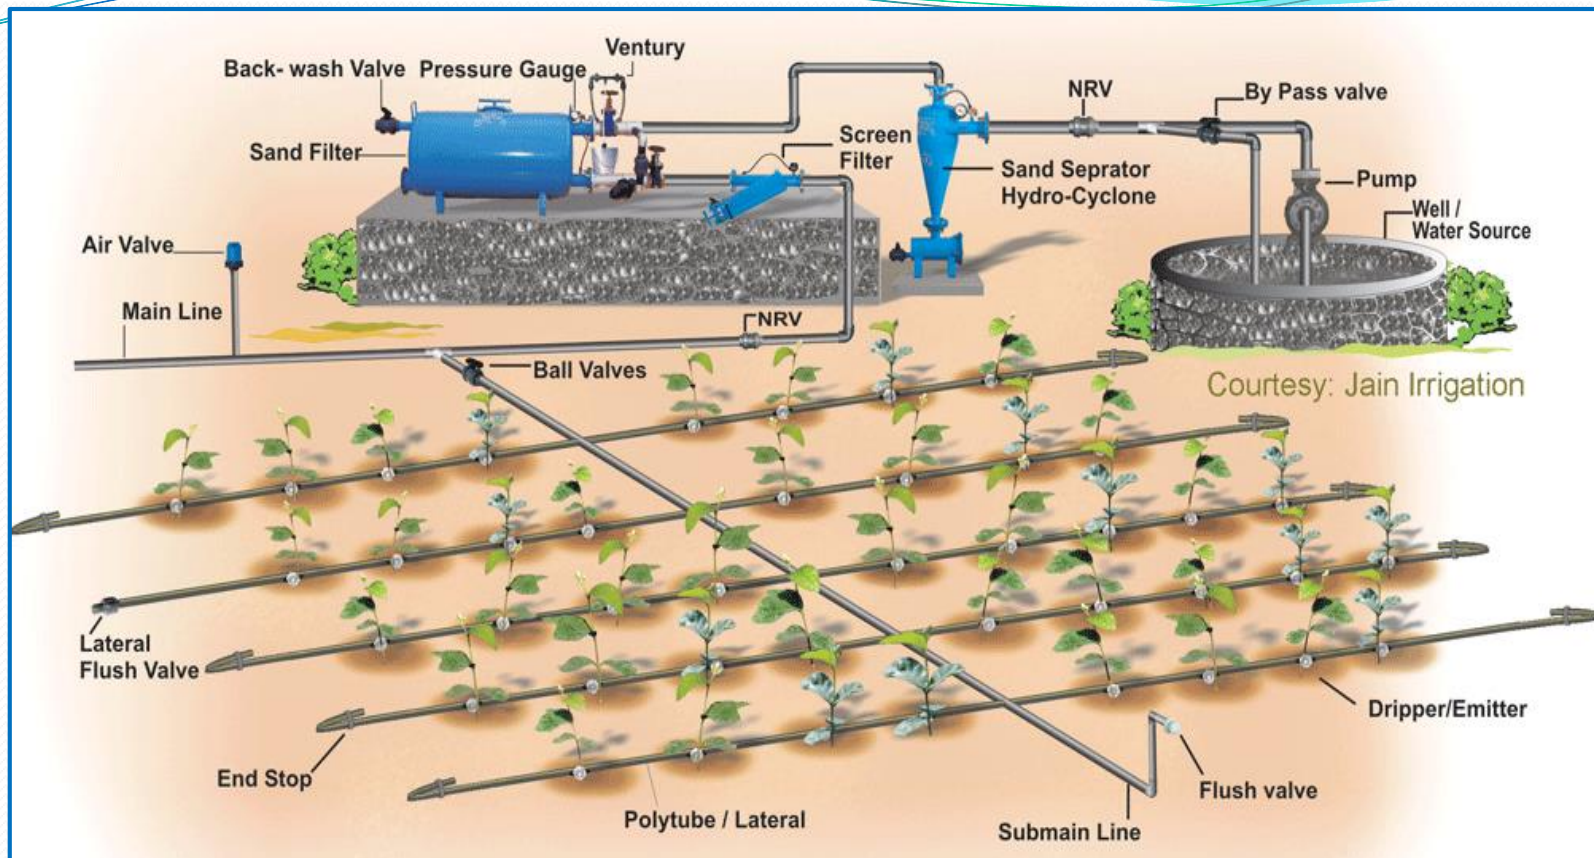

## What is Drip Irrigation?

- Drip-irrigation, also known as micro-irrigation or trickle-irrigation is a remarkable water technology developed decades ago.
- Drip irrigation is the targeted, intelligent application of water, fertilizer, and chemicals that when used properly can provide great benefits
- Today it is commonly used all over the world in agricultural, nursery, greenhouse, landscape and a variety of industrial applications.

Well- манба, қудук

Pump- насос

• Sand Separator-қум сепаратори тармоқни ювувчи клапан

Ventury- ўғит қўшувчи

Sand Filtr- қумли фильтр

Main Line- магистрал тармоқ;

Submain Line- ер ости тармоғи

Lateral- суғориш тармоғи

Dripper- томчилатғич

Flush valve- ювувчи клапан

Lateral Flush Valve-

Ball Valves- шарикли клапан
